

Microsoft® Licensing Options

License Pricing for Missouri Schools

As of March 1, 2011, Microsoft® offers two pricing programs for schools. Midwest Computech can work with you and your school's specific needs to determine which Microsoft® Licensing models offer the best solutions.

- Microsoft® School Agreement Program
- Microsoft® Enrollment for Education Solutions

Microsoft® Licensing Options

License Pricing for Missouri Schools

Microsoft® School Agreement Program

This classic subscription licensing program for primary and secondary schools offers compliance based on number of PCs and a simple subscription model.

Benefits

- Easy compliance of once a year desktop platform counting whether you have one building or an entire district to manage.
- Low administration with a centralized subscription licensing model.
- The most current software versions can be run by all of your users which includes automatic updates during your agreement.
- Simple budgeting and purchasing system allows for one annual payment to cover all of your products for the year.
- Student Licensing options available to provide licensing on personal or loaned machines.

With two licensing options available for your school, Midwest Computech can work with you to determine the best solution to meet your school's needs.

Combined with other quality products and services, like ETAP™ (Educational Technical Assistance Program), Midwest Computech offers complete IT support for Missouri schools of all sizes.

Contact us about what options are available for your school.

Microsoft® Enrollment for Education Solutions (EES)

Based on the number of full-time employees instead of PCs, EES provides a simple system for schools to acquire software through a single subscription enrollment process.

Benefits

- Easy compliance of once a year full time employee counting. No need to be reliant on PC quantity or worry about annual fluctuations.
- Customized options with the ability to add single products or whole system licenses at any time during the year.
- Tracking systems allow for complete control of your licenses and deployed systems through a single online portal.
- Simple administration techniques to track all licenses so there is no need to constantly monitor locations and compliance.
- Budget pricing and included access to work at home rights for faculty and staff, product evaluation, Software Assurance for Microsoft Volume Licensing, and Microsoft Live@edu
- Student Licensing options available to provide licensing on personal or loaned machines.
